

bp lathi signals and pdf

Baseband is a signal that has a very narrow and near-zero frequency range, i.e. a spectral magnitude that is nonzero only for frequencies in the vicinity of the origin (termed $f = 0$) and negligible elsewhere. In telecommunications and signal processing, baseband signals are transmitted without modulation, that is, without any shift in the range of frequencies of the signal.

Baseband - Wikipedia

Choosing Electrical optional. Electrical is highly rewarding optional but it is also hectic in terms of efforts needed. As there is no availability of ready-made material, you have to rely on reference books for completion of a topic.
