Design is the creation of a plan or convention for the construction of an object, system or measurable human interaction. Design has different connotations in different fields (see design disciplines below). In some cases, the direct construction of an object (as in pottery, engineering, management, coding, and graphic design) is also considered to use design thinking.

Game design is the art of applying design and aesthetics to create a game for entertainment or for educational, exercise, or experimental purposes. Increasingly, elements and principles of game design are also applied to other interactions, particularly virtual ones (see gamification).. Game design creates goals, rules and challenges to define a board game, card game, dice game, casino game ...

Designing the perfect warehouse is an area where even angels can fear to tread. The devil is in managing myriad details, complicated by the fact that a design made in heaven is never the same for any two facilities-even within the same organization. While the process is exhaustively detail-laden ...
