

network analysis architecture and pdf

Network architecture is the design of a communication network. It is a framework for the specification of a network's physical components and their functional organization and configuration, its operational principles and procedures, as well as data formats used. In telecommunication, the specification of a network architecture may also include a detailed description of products and services ...

A Scalable, Commodity Data Center Network Architecture

A social network is a social structure made up of a set of social actors (such as individuals or organizations), sets of dyadic ties, and other social interactions between actors. The social network perspective provides a set of methods for analyzing the structure of whole social entities as well as a variety of theories explaining the patterns observed in these structures.

Today, both architects and business leaders understand the importance of networks to competitive advantage. Recognizing this, they are seeking better ways to architect and evolve networks based on the current and future needs of the business. The Art of Network Architecture is the first book that places business needs and capabilities at the center of the process of architecting and evolving ...

2.1.5 Analytics Node. Figure 7 below shows the internal structure of an analytics node. An analytics node communicates with applications using a north-bound REST API, communicates with other analytics nodes using a distributed synchronization mechanism, and with components in control and configuration nodes using an XML-based protocol called Sandesh designed specifically for handling high ...

BIOS Security. In 2011 the National Institute of Standard and Technology (NIST) released a draft of special publication 800-155. This document provides a more detailed description than the Trusted Platform Module (TPM) PC client specification for content that should be measured in the BIOS to provide an adequate Static Root of Trust for Measurement (SRTM).

I was very excited to read the recent EE Times article "RISC-V: An Open Standard for SoC" by Krste Asanović and David A. Patterson announcing their open source processor architecture. As we near the end of CMOS scaling, the bulk of future performance and efficiency improvements will need to come from architecture improvements.
