In optics a ray is an idealized model of light, obtained by choosing a line that is perpendicular to the wavefronts of the actual light, and that points in the direction of energy flow. Rays are used to model the propagation of light through an optical system, by dividing the real light field up into discrete rays that can be computationally propagated through the system by the techniques of ...

Time and time again, "multidisciplinary" research is touted as essential to innovation. That is why, from April 2-6, 2018, researchers working in seemingly unrelated fields gathered in Phoenix, Arizona, to promote, share and discuss issues and developments across disciplines.. The 2018 MRS Spring Meeting & Exhibit is the key forum to present research to an interdisciplinary and international ...
