Codes and Standards Update: Safety Instrumented Burner

A high-integrity pressure protection system (HIPPS) is a type of safety instrumented system (SIS) designed to prevent over-pressurization of a plant, such as a chemical plant or oil refinery. The HIPPS will shut off the source of the high pressure before the design pressure of the system is exceeded, thus preventing loss of containment through rupture of a line or vessel.

High-integrity pressure protection system - Wikipedia

USPAS January 2012 Controlling Risks: Safety Systems IEC 61508 The IEC 61508 specifies 4 levels of safety performance for a safety function.

Controlling Risks Selecting a Safety Integrity Level

Process Safety Competency (PDF; 1 MB) Successful Process Safety requires the utilization, involvement, and full support of nearly ALL staff at a site. Success also demands that a substantial portion of staff be competent and capable of contributing to process safety programs, including Incident Investigation and Root Cause Analysis. This paper describes the basics of building competencies in ...
