Colby College Gibbs Phase Rule: $f = c - p + 2$ $f =$ Intensive Degrees of freedom = variance Number of intensive variables that can be changed independently without

Gibbs Phase Rule: $f = c - p + 2$

The phase rule is a general principle governing systems in thermodynamic equilibrium. If F is the number of degrees of freedom, C is the number of components and P is the number of phases, then $F = C - P + 2$. It was derived by Josiah Willard Gibbs in his landmark paper titled On the Equilibrium of Heterogeneous Substances, published in parts between 1875 and 1878.

The lever rule is a tool used to determine the mole fraction (x_i) or the mass fraction (w_i) of each phase of a binary equilibrium phase diagram. It can be used to determine the fraction of liquid and solid phases for a given binary composition and temperature that is between the liquidus and solidus line. In an alloy or a mixture with two phases, L and S , which themselves contain two ...
